

Is that the best you can do?

A client requests a coverage change and needs the updated policy immediately. But it will take a couple of hours. Is that the best you can do?

Real Time speeds up policy changes and many other customer-service processes. And, Real Time is already on your agency's automation system!

Say goodbye to double entry

The recent AUGIE survey found double-entry is the major automation "time-waster" for most agents.

Real Time can simplify your agency's workflows, eliminate double-entry and speed up many other customer-service processes. And, Real Time is already on your automation system!

Having memory problems? It's probably because you're trying to remember passwords for several carrier Web sites.

Real Time can improve your agency's workflows and replace separate entry of each carrier password with automated logons. And, Real Time is already on your automation system!
